Subject: [Action required] You have 30 days to upgrade your Thank you page

Complete your upgrade by Aug 28, 2025 to avoid restrictions

shopify

Hi Jacqui,

You have 30 days remaining before restrictions will be placed on RegimA WWD, RegimA Zone SA and RegimA DST due to the **August 28 deadline to upgrade your Thank you and Order status pages.**

Review your customizations and upgrade via your personalized upgrade guide.

On **August 28, 2025** limitations will be placed on your stores if they are not upgraded:

- **PII will no longer be collected on the legacy pages:** This may impact ad performance, customizations or automations that show or rely on sensitive customer information.

- **Additional scripts and checkout.liquid will not be editable:** The only way to make changes to these pages will be to upgrade.

- **The ability to revert to your legacy pages will be removed.** Currently, you can upgrade and revert as part of your testing process. After the deadline, upgrading will be permanent.

Stores without customizations may be upgraded at any time, while those with customizations will receive a 30-day notice before automatic upgrades in **January 2026**.

When your stores are auto-upgraded:

- All customizations on the legacy pages will be lost.

- The pages in your published checkout configuration will replace your legacy versions.

- PII will once again be included in `checkout_completed` events in pixels.
