Good afternoon everyone

Please let me know what the progress is with the analysis and when I can expect it?

Kind regards,

Danie Bantjes

Dear Jacqui, Danny and Peter

Regarding the uncertainties surrounding the computer expenses as well as the financial status of the Regima Group of Companies, I would like to suggest the following:

1. I prefer not to meet with individual parties regarding this matter to maintain my impartiality. Instead, I will present a factual report on:
   - Consolidated External Revenues for the past two years
   - Consolidated Net Trading Profits or Losses for the past two financial years for the entire group
   - Computer expenses over the past two financial years
   - The consolidated bank balances across the Group.

2. Computer Expenses – details:

Attached is a schedule of all computer expenses allocated by Rynette for March and April 2025.

Danny to kindly provide the following next to each expense:

- Description of the expense (licenses, usage costs, etc.) in layman's terms.
- Current or future business application.
- Justification from SARS' perspective as " in the production of income." This serves a dual purpose, as I'm expecting SARS to audit our computer expenses claimed for tax, so this gets us ready for such an audit.

I trust this will be in order.

Kind regards,

Danie Bantjes
